SUMMARY

As a **Frontend Developer**, I specialize in building highly responsive and interactive web applications with a focus on delivering exceptional user experiences through clean and maintainable code. I leverage modern frontend technologies and industry best practices to create high-performance interfaces, ensuring accessibility and seamless cross-platform compatibility.

EDUCATION

Bachelor's Degree (GPA: 3.5/4.0)

VNU-HCMUT, Ho Chi Minh City University of Technology

2022 – Present

Ho Chi Minh City, Vietnam

High School Diploma (Physics-oriented Program)

Bac Lieu High School For The Gifted

2019 – 2022

Bac Lieu, Vietnam

SKILLS

English	TOEIC Listening and Reading 710
Programming Languages	TypeScript, JavaScript, C++, SQL, PHP, Python, Java.
Databases	Microsoft SQL Server, MySQL, PostgreSQL, MongoDB.
Frameworks	ExpressJS/ NodeJS, Next.js, NestJS, Expo.
Libraries	React.js, React Native, Redux, Shadcn/ui, MUI/ Material UI.
Others	HTML/CSS, Prisma, Docker, Supabase, Git, Figma, Agile Scrum.

WORK EXPERIENCE

mgm technology partners Vietnam

Dec 2025 - Feb 2026

- Internship | Software Engineer
- Build a platform for English writing featuring a rich text editor, real-time AI-powered feedback and suggestions, easy sharing of writing pieces, and a community space to exchange ideas and improve English writing skills.
- Ho Chi Minh City, Vietnam, On-site

Apollonix, Inspiring Innovation Delivering Solutions

Jun 2025 - Aug 2025

- Internship | Frontend Developer
- Developed the frontend of a task management system for a logistics enterprise, focusing on intuitive UI design, responsive layouts, and a seamless user experience to support efficient workflow tracking and team collaboration.
- Ho Chi Minh City, Vietnam, On-site

CERTIFICATE

SDWS Training

Axon Active - Agile Software Development Company

- Issued Jun 2025 | [Credential Link](#)
- Introduces the basics of Agile and Scrum: key values and practices for adaptability, main roles (Product Owner, Development Team, Scrum Master), and core artifacts (Product Backlog, Sprint Backlog, Increment) that guide and deliver project outcomes.

PROJECTS

SmartDKDH – Home Automation System

Multidisciplinary Project

Frontend Developer | 5-member team

Feb 2025 – Apr 2025

- **Description:** IoT-based home automation system enables users to monitor and control household devices via a mobile app, integrating with the Adafruit IO platform for real-time control and sensor data monitoring.
- **Responsibilities:** Developed and iterated React Native / Expo mobile app, implementing authentication flows, device control (lights, fans), and real-time sensor dashboards. Integrated REST APIs, WebSocket streams, and Adafruit IO to ensure consistent device state synchronization. Built user and device management screens with full CRUD operations aligned with backend contracts. Collaborated on integration testing, debugging cross-service issues, and improving UI/UX consistency.
- **Technologies:** React Native, Expo, WebSocket, FastAPI, MongoDB.
- Repository: github.com/Enigmask22/SmartDKDH

Day Mood - Mood Journaling App

Mobile Application Development

Full-stack Developer | 4-member team

Feb 2025 – May 2025

- **Description:** Cross-platform mood journaling application supporting emotion tracking, activity logging, and secure media attachments to enhance user self-awareness.
- **Responsibilities:** Built core React Native features for journaling flows, input handling, and media attachments. Designed and implemented backend services using NestJS with Prisma ORM and PostgreSQL, covering authentication, journal records, and file upload pipelines. Designed UI/UX flows in Figma and published visual case study on Behance to align design and implementation. Participated in architecture discussions, bug fixing, and release preparation.
- **Technologies:** React Native, NestJS, Prisma, PostgreSQL, JWT, Figma.
- Frontend: github.com/Enigmask22/DayMood
- Backend: github.com/Enigmask22/DayMood-Backend
- Behance: <https://www.behance.net/gallery/222654927/DayMood>

ATS – Applicant Tracking System

Personal Project

Full-stack Developer

Mar 2025 – Present

- **Description:** A full-stack recruitment management platform designed to streamline the application process for both candidates and employers, featuring comprehensive job tracking and candidate management.
- **Responsibilities:** Architected and built the entire application from scratch using Next.js 16 (App Router) and React 19. Implemented a robust candidate tracking system with a centralized dashboard for managing job listings, applications, and candidate profiles. Integrated Appwrite for scalable storage and Resend for automated email notifications and implemented Shadcn UI with Tailwind CSS 4 for a modern, responsive UI. Refactored API logic to React Query hooks to improve state management and data fetching efficiency.
- **Technologies:** Next.js 16, React 19, TypeScript, Prisma, Appwrite, Resend, Tailwind CSS 4.
- **Repository:** github.com/hungdt31/ats

ACTIVITIES

THE INNOVATION WINNER PRIZE of The Explosion Competition 2022.

Final Round of the IT Contest Code Your Future 2024 held by CJ OLIVENETWORKS VINA.

THE SPRING VOLUNTEER CAMPAIGN in 2024 and 2025.
